

## eSAS Scholars' Day Program

The Scholars' Program is specifically designed for early-stage anesthesiology scholars and focuses on topics unique to them, such as sharpening skills and best practices, career and publishing advice, and networking. The program also provides an opportunity to network, interact with, and learn from established anesthesiologists.

**There is a \$50 additional fee to attend this program, which is open to all Annual Meeting registrants.**

### Friday, March 21, 2025 – eSAS Mentoring Meetup
